

Barbados

Average score 91%

Highest 152%
Lowest 56%

Practical effect to be expected of SolarDrive S2E (200 W)

Trail type - golf course			Light	Medium	Heavy
Consumption	18 holes	kWh	0.80	1.10	1.60
Power production	High (best month)	kWh	1.21	1.21	1.21
PRP* supplied by SolarDrive S2E	High (best month)	kWh	152%	110%	76%
Power production	Low (weakest month)	kWh	0.90	0.90	0.90
PRP* supplied by SolarDrive S2E	Low (weakest month)	kWh	113%	82%	56%
Power production	Yearly Average	kWh	1.00	1.00	1.00
PRP* supplied by SolarDrive S2E	Yearly Average	kWh	125%	91%	62%

*Percentage of Required Power

Basic data

Nominal effect	kW												Lat.	13.1	Lon.	-59.3
Solar insolation	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Average			
kWh/m2/day**	5.48	6.14	6.67	6.91	6.71	6.21	6.52	6.56	6.08	5.64	5.14	5.19	6.10			
Avg. day temperature (C)	26.8	26.4	26.4	26.8	27.5	27.8	27.8	28.0	28.1	28.0	27.8	27.4	27.4			
Avg. day temperature (F)	80.2	79.5	79.5	80.2	81.5	82.0	82.0	82.4	82.6	82.4	82.0	81.3	81.3			
Temperature loss factor	0.93	0.94	0.94	0.93	0.93	0.93	0.93	0.93	0.93	0.93	0.93	0.93	0.87			
System loss factor	0.94	0.94	0.94	0.94	0.94	0.94	0.94	0.94	0.94	0.94	0.94	0.94	0.94

Heavy trail	60%	68%	73%	76%	74%	68%	71%	72%	66%	62%	56%	57%	62%

Additional golf holes using SolarDrive on Top

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Average
Light trail	22	24	26	27	26	24	26	26	24	22	20	20	22
Medium trail	16	18	19	20	19	18	19	19	17	16	15	15	16
Heavy trail	11	12	13	14	13	12	13	13	12	11	10	10	11

Potential CO2 savings/car/year* 180 to 310 kilos or 398 to 683 lbs.**

**Source: NASA Langley Research Center Atmospheric Science Data Center (22 year average)

***CO2 savings are calculated compared to grid electricity supplied from modern power plants burning fossil fuels (0.49-0.85 kg CO2/kWh)

****If battery charge level is low from the start the S2E must be allowed the necessary time to charge as the energy is accumulated over the day

Disclaimer:

SolarDrive takes no responsibility for the correctness of the basic data obtained from NASA nor for the actual experienced results. The figures above is presented as a guideline only. The actual result may be influenced by many other factors as well e.g. length of course, battery watering, altitude, time of year, time of day, present weather conditions, local shades from houses, trees, mountains, tire inflation, general maintenance etc.
